Cloud systems are among the fastest-growing segments of the physical security industry. The fortunes of integrators can improve when they embrace a recurring monthly revenue (RMR) model, and cloud systems are expanding the services and features manufacturers can provide, from remote diagnostics to simplified system design. But for all the success of cloud systems, there remains confusion in the market about the exact definition of “cloud.” Or does there? SecurityInformed asked their Expert Panel Roundtable: What is “the cloud?”

As a member of this panel, Scott Lindley, Farpointe’s General Manager, addresses cloud-based electronic access control.
