## CYBER VULNERABILITY IN ACCESS CONTROL

Tips and tricks to keep your customers' credential-based systems secure

By **Scott Lindley**  
 General Manager, Farpointe Data  
 As seen on [Security InfoWatch](#)

As access control credential and reader systems become increasingly attached to networks and other smart systems in the world of IoT, cybersecurity becomes a major concern. Those integrators and end-users who fail to secure this security equipment provide often irresistible backdoors for hackers.

## Farpointe Expands Social Media Presence

To give our customers quicker access to industry trends, product updates, best-practices, and more, Farpointe has expanded its social media presence.

If you are on [LinkedIn](#), [YouTube](#), [Facebook](#), or [Instagram](#), connect with us and start a conversation. We'd love to hear how you are using Farpointe products or answer any technical questions you may have.

## Seen on the Street

The P-300 Proximity Reader is part of the *Pyramid Series* Proximity® line of 125-kHz RFID readers and credentials. The P-300 is designed for mullion-mount applications, has excellent read range and read speed, and is fully sealed in weather- and tamper-resistant epoxy potting for installing indoors or out. The P-300 reader shown here was spotted on a metal gate in Denver, Colorado.
