## CYBER REMEDIES

By **Scott Lindley**  
General Manager, Farpointe Data  
As seen on [Professional Security Magazine Online](#)

Protecting your customers from hackers is imperative. Threats have grown from teenage mischief makers to sophisticated government-backed entities, and now, even advertising and analytics companies. Think Ferris Bueller, Iran and Quibi. With knowledge of what these hackers seek—and the straight-forward, undemanding remedies that are becoming available to thwart them—there is little reason not to incorporate basic cyber-security into your access control solutions.

Multiple credentials—which use a smartphone's Bluetooth Low Energy (BLE) technology to communicate with Conekt mobile-ready readers—can be loaded into the Conekt Wallet App.

## Product Spotlight: CONEKT® CMC-2 Mobile Credentials

With a convenient cloud-based delivery system and no physical credentials to inventory, Conekt mobile credentials are quicker and easier to order, distribute, and maintain.

### Benefits:

- Supports both industry-standard and custom access control formats
- Delivered in the exact ID sequence ordered—no under- or over-runs
- Options to private label—logo, graphics, text and more
- Secured by AES encryption—proven data protection
- Operates on Apple® iPhone® and Google® Android™-based smartphones
